- User friendly GUI
- Graphic view and gantt chart view
- Flexible view option for Missed, mismatch and free slots
- Automated/Manual SIR messages
- Automatically receive messages and update
- Able to Merge/split slot messages
- Automated/Manual leg difference update
- Slot telex messages

## Live Slot Gantt Chart

- Colored graphical view for live flights
- Multiple search options
- Users can list daily slots
- Grid view and graphical view
- Customizable graphical view
- Every action has own security process
- Advanced slot list

## Crane SC-Slot Coordination

*Crane SLOT* has been integrated with Crane SP module to take over the complete slot handling process. Crane Slot Coordination creates and manages SCR/SMA telex messages for communication with the airport coordinator and takes into historic slots for initial submission.

*Crane SLOT* receives and manages coordination responses, providing user with total control over the slot management process.

*Crane SLOT* also provide user Live Slot Monitor for quick response and absolute control of slot process. Slot Coordination ensures that no slots are lost.

*Crane SLOT* reduces time in matching “required slots” with “slots held”. The well designed user help file allows intuitive control of the system for maximisation of use with simple training activities.

*Crane SLOT* improves your aircraft productivity by assisting airlines to better utilise commercial slots thus improving aircraft rotations.

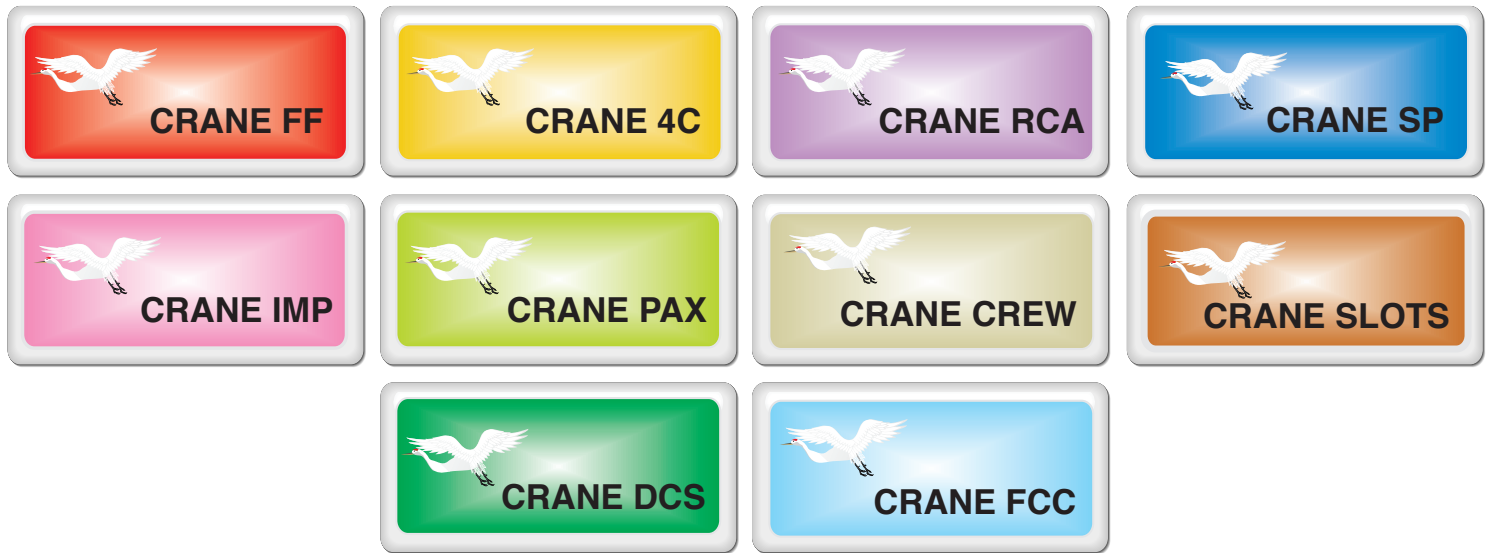

*Crane SLOT* provides the ability to select appropriate slots for schedules at heavily congested airports.

***Crane SLOTS. Advanced slot coordination.***
